SCIENCE CLUB FOR GIRLS

VIRTUAL SUMMER ROCKETRY PROGRAM

Get ready to explore STEM (Science, Technology, Engineering, Mathematics) through hands-on science activities in our **FREE** two-week VIRTUAL summer program. This summer our young scientists will build and launch their own rockets (field trips for launching will use social distancing protocol). Throughout the session participants will learn leadership skills and build confidence in STEM in preparation for our Junior Mentor Program.

TO APPLY: Contact Hannah Weinstock | Program Manager
