**SUPPLEMENTARY INFORMATION:****I. Abstract**

USPTO engages in a robust marketing strategy that historically results in a high volume of applications from recent college graduates with engineering and science degrees for entry-level patent examiner positions. In FY2020, USPTO received 7,361 applications and ultimately hired 597 new patent examiners.

USPTO uses the Monster Hiring Management (MHM) system to rapidly review applications for employment of entry-level patent examiners. The use of such automated online systems during recruitment allows USPTO to remain competitive, meet hiring goals, and fulfill the Agency’s Congressional commitment to reduce the pendency rate for the examination of patent applications. Given the time sensitive hiring needs of the Patent Examining Corps, the MHM system provides increased speed and accuracy during the employment process.

This information collection covers respondent data gathered through the MHM system. The MHM online application collects supplemental information to a candidate’s USAJOBS application. This information assists USPTO Human Resource Specialists and Hiring Managers in determining whether an applicant possesses the basic qualification requirements for a patent examiner position. From the

information collected, the MHM system creates an electronic real-time candidate inventory on applicants’ expertise and technical knowledge, which allows USPTO to immediately review applications from multiple applicants.

The use of the MHM online application fully complies with 5 U.S.C. 2301, which requires adequate public notice to assure open competition by guaranteeing that necessary employment information will be accessible and available to the public on inquiry. It is also fully compliant with Section 508 (29 U.S.C. 794(d)), which requires agencies to provide disabled employees and members of the public access to information that is comparable to the access available to others.

**II. Method of Collection**
