

Committee: Directly to Council

Staff: Marlene Michaelson, Executive Director

Purpose: Receive briefing and have discussion - no vote

expected

Keywords: CARES Act, CRF, Coronavirus Relief Fund

AGENDA ITEM #9 October 13, 2020

Discussion

SUBJECT

Update on the Federal Coronavirus Relief Fund

EXPECTED ATTENDEES

- Rich Madaleno, Chief Administrative Officer
- Dr. Earl Stoddard, Director, Office of Emergency Management and Homeland Security

COUNCIL DECISION POINTS AND COMMITTEE RECOMMENDATION

None

DESCRIPTION/ISSUE

The Council will receive a status report on appropriations and expenditures from the Coronavirus Relief Fund (CRF).

SUMMARY OF KEY DISCUSSION POINTS

- On March 27, 2020 the Federal Coronavirus Aid, Relief, and Economic Security (CARES) Act was enacted. The CARES Act established the CRF and appropriated \$150 billion to the fund. Under the CARES Act, the fund is to be used to make payments for specified uses to States and certain local governments. Montgomery County received \$183,336,953 from the Federal CRF.
- Since all funds must be used by December 31, 2020, it is important to track the County's use of the funds and whether any reallocations or additional appropriations are necessary.
- The attached staff report also provides an update on expenditures for the pay differential provided to certain employees, which could use a significant amount of CRF and General Fund dollars

MEMORANDUM

October 13, 2020

TO: County Council

FROM: Marlene Michaelson, Executive Director

Craig Howard, Deputy Director

SUBJECT: Update on the Federal Coronavirus Relief Fund

This memorandum provides a status report on appropriations and expenditures from the Coronavirus Relief Fund (CRF). Since all funds must be used by December 31, 2020, it is important to track the County's use of the funds and whether any reallocations or additional appropriations are necessary. In addition, this memorandum updates the Council on expenditures for the pay differential provided to certain employees, which could use a significant amount of CRF and General Fund dollars. Attached on ©1-6 are materials provided by Executive Branch staff in response to Council staff questions.

Background

On March 27, 2020 the Federal Coronavirus Aid, Relief, and Economic Security (CARES) Act was enacted. The CARES Act established the Coronavirus Relief Fund (CRF) and appropriated \$150 billion to the fund. Under the CARES Act, the fund is to be used to make payments for specified uses to States and certain local governments, and Montgomery County received \$183,336,953 from the Federal CRF. Initially the Council approved special appropriations using the General Fund to address the emergency situation immediately. Once CRF funding became available the Council used that funding to repay the General Fund for expenditures allowed under the CARES Act and for all subsequent eligible expenditures.

Appropriations

Since the onset of the Pandemic, the Council has approved 31 special appropriations to address the needs of residents and businesses impacted by COVID-19, many of which were eligible for CRF funding. On June 16, 2020 the Council approved a Special Appropriation for \$80 million (M) both to reimburse previous expenditures from the General Fund for eligible COVID-19 expenditures (\$49M) and an additional approximately \$31M to be spent on one of a number of specific categories listed in the resolution approving the Special Appropriation. Use of the remaining balance required future Council appropriations. On July 28, the Council amended the resolution approving the Special Appropriation to allow additional uses of the CRF, consistent with new guidance from the federal government.

As the summary chart on ©2 indicates, \$100.6M has been appropriated in COVID-19 related special appropriations this calendar year, with \$10M assumed for municipal/outside agency reimbursements. An additional \$82.2M is expected to be spent during the remainder of the year for "placeholder" expenses, primarily for items that will not be funded (or not funded in full) by the Federal Emergency Management Agency (FEMA), as discussed further below. The Council has already appropriated approximately \$31M for these operational expenditures via the June 16 special appropriation described above. It is possible that these expenditures could be significantly greater than \$88.2M. Even assuming that the placeholder costs will not exceed \$88.2M, the total estimated expenditures exceed the CRF funding by approximately \$9.4M. The list of placeholders also includes \$17.8M for the County Match for the pay differential, which is discussed in greater detail below.

Expenditures

The chart on ©3-5 provides information on the expenditures and encumbrances for each of the special appropriations approved by the Council. Some of these appropriations have been entirely spent and others are on track to be spent by the end of the year. Staff recommends that the Council ask Executive Staff to provide information on each appropriation for which expenditures are significantly less than the amount appropriated to understand whether there has been insufficient demand for the program or a problem with implementation. Executive staff notes indicate that some of these are expected to be fully encumbered by the end of the year, but the Council may still want additional discussion to confirm that will occur. These appropriations are listed below. Status notes are taken directly from the attached chart.

Res. #	Purpose	Approp. Amount	Total Spent and Encumbered	Status Notes
19-439	Emergency Assistance Relief Payment (EARP) Program	\$5,000,000	\$0	This will be Phase 4 of EARP and will provide direct financial assistance to residents who were not eligible in previous phases.
19-499	3R Program (Reopen, Relaunch, Reimagine) – Economic Development	\$500,000	\$142,500	MCEDC confirms that this appropriation will be expended by the end of the year.
19-506	Food Assistance/ Security	\$10,300,000	\$5,052,209	The Task Force finalized the list of awardees of the Capacity Building Grants. \$1,025,880 was awarded to 28 local Food Assistance Providers to improve their infrastructure and expand their capacity to provide food access to hard-to-reach communities in Montgomery County. To date, the Task Force has spent a total of \$5,052,209 to implement the response strategy. This funding will be completely expended by the end of the year as the needs exceeds the appropriation (and will be supported by FEMA reimbursements as well).

19-523	Reopen Montgomery Initiative	\$14,000,000	\$1,431,538	To date, the Reopen Montgomery program has received 3,169 applications. It has conducted three lottery selections (the most recent was 9/16/20) and has approved 422 applications in the total amount of \$1,431,538. This program will be emphasized for completion to ensure spend down over the next month.
19-535	Business Assistance for Medical and Dental Clinics	\$3,000,000	\$0	Executive Staff is reviewing the details of the program for medical and dental practices.
19-557	Rental Assistance and Eviction/Homelessness Prevention	\$20,000,000	\$607,508	The online portal received 2,200 applicants as of end of September – 50% were from targeted areas. To date, 145 checks have been issued totaling \$436,788.

There are also several special appropriations recently approved by the Council or for which a contract was just initiated. The Council may want to get an update as to whether Executive staff believes the allocated funds can be spent before the end of the year.

Res. #	Purpose	Approp. Amount	Total Spent and Encumbered	Status Notes
19-490	Unemployment Insurance Outreach	\$40,000	\$0	Amended contract with WorkSource Montgomery has been finalized.
19-524	Maryland Tech Council – Business Continuity Task Force	\$250,000	\$0	Contract has been finalized and signed.
19-551	Assistance to Distressed, Affordable Common Ownership Communities	\$2,025,000	\$0	Contract is in the process of being finalized with the organization who will manage the program.
19-556	Permanent Supportive Housing for Veterans and Unsheltered Adults	\$355,000	\$0	Contract is in the process of being finalized.
19-560	Hospitality and Tourism Support	\$200,000	\$30,492	Contract was finalized week of September 7. The amount shown represents the first invoice received and paid.
15-589	Countywide Program – Youth Sports Initiative	\$1,000,000	\$0	Adopted 9/15/20
19-590	Youth Sports Initiative	\$550,000	\$0	Adopted 9/15/20
19-611	School-Age Child Care During Distance Learning	\$7,687,000	\$0	Adopted 9/29/20

Finally, the Council may wish to discuss whether those special appropriations that are expected to be fully encumbered by the end of year to determine whether they will provide enough funding through the end of 2020, particularly for the most critical needs such as food security and early care and education.

FEMA Reimbursements

Executive staff are in the process of preparing submissions to FEMA for eligible expenditures. At this point they estimate that total submission could range from \$70M to \$125M. They also estimate that approximately \$50M in CRF dollars will be needed for expenditures rejected by FEMA and for the required local match, which is included in the list of placeholders on ©2. If FEMA rejects more than expected, the costs will be covered by CRF funding (if there is any remaining and the County learns of the rejection before December 31). They anticipate submitting a request for the first \$24M within the next two weeks and hope for a response six weeks later. The complicated process of submitted a FEMA request has led the County to hire contractors to help with the process. Due to the length of time required to prepare submissions and receive a response, we are unlikely to know whether the County will be reimbursed for most expenditures that appear to be eligible for FEMA funding before the end of the year.

COVID-19 Pay Differential

On April 5, the Chief Administrative Officer announced that the County had reached an agreement with the three employee unions to provide a pay differential for staff whose jobs cannot be performed remotely during the COVID-19 health crisis. The CAO also extended the same differential to non-represented employees on the general salary schedule (GSS). The differential does not apply to MLS, PLS, or Fire management employees. The details of the pay differential include:

- The differential pay is uniform for FOP and IAFF members. For MCGEO-represented and GSS employees, the differential distinguishes between front-facing onsite and back office onsite work.
- The front-facing onsite employees receive an additional \$10/hour and the back-office onsite receive \$3/hour.
- Represented employees also received one week of compensatory time for the period from March 22-28.

The agreements cover six pay periods starting March 29, or until the Maryland State of Emergency is lifted. The agreements also stated that if the State of Emergency is still in effect at the end of the six pay periods, the agreements will be revisited. As the State of Emergency is still in place, and the Executive and the unions have not renegotiated the agreements, the full differential pay remains in effect.

Cost of Differential. As detailed on ©6, the Executive Branch reports that through the pay period ending on September 26, 2020 the pay differential has cost \$49.2M. Additionally, the Executive Branch estimates that if the pay differential were to continue through December 31 without any changes the total cost would increase to approximately \$72M.¹ If the differential were paid for a full year, the total cost projects to approximately \$100M. The table on the next page shows the total cost to date broken out by employee group.

¹ Assuming service delivery levels do not change, there are no events requiring significant public safety response or outreach, that staffing availability remains constant, and that there is no change to the rate of the pay differential.

Summary of Pay Differential Cost by Employee Group (as of 9/26/20)

Employee Group	Total Cost
MCGEO	\$21,970,851
Fire	\$14,979,858
Police	\$9,830,704
Non-Represented	\$2,452,405
Total	\$49,233,818

Additionally, as the County reopens more programs and facilities and staff return to the workplace in front-facing positions the cost of the differential could increase if more employees become eligible.

Potential FEMA Reimbursement. Previously, the Executive Branch had indicated that the pay differential would likely be eligible for FEMA reimbursement – meaning that the County might only be required to cover 25% of the total cost. However, the County has yet to apply for or receive FEMA reimbursement for these costs. In preparation for this briefing, the Executive Branch provided the following update on the status of FEMA reimbursement for the pay differential: "These remain pending. There were changes in the FEMA reimbursement guidelines on September 15 and other reimbursement rulings that created significant questions about some personnel cost eligibility. We met with FEMA representatives on Monday, October 5 to clarify some of these questions and are proceeding with data collection for reimbursement. We have added a large number of staff to this effort to address the increasing data collection burden." Based on the updated guidance from FEMA, even in the best-case scenario, it is likely that the County will need to cover much more than 25% of the total cost of the pay differential.

Pay Differentials in Other Jurisdictions. In response to a request for additional information, Council staff prepared a research memo that details pay differential policies implemented in Maryland jurisdictions and selected neighboring jurisdictions during the COVID-19 health emergency (attached at ©7-12). Notable findings include:

- 11 local jurisdictions, including the State of Maryland and Washington DC, implemented some form of a pay differential policy during the pandemic. Of these jurisdictions, the pay differential policies remain in effect in five and have expired in six.
- In all jurisdictions, eligibility for the pay differential focused on "essential" or "front-facing" employees that could not work remotely.
- The structure of pay differentials vary among jurisdictions, with some providing a per hour differential and others providing a fixed dollar amount.
- Applying the pay differential to a common 80 hour pay period, the jurisdiction with the highest maximum pay differential that an employee could receive is Montgomery County with \$800. The lowest maximum was Baltimore City and Baltimore County with \$100 per 80 hour pay period.
- Some jurisdictions tied their policy to the duration of the County/State declared State of Emergency, while others limited their policy to a specific number of pay periods, a set termination date, or fiscal capacity.

Fiscal Context. As noted previously, the County Executive and the employee unions have not renegotiated the original pay differential despite the public health emergency extending beyond the initial anticipated length of six pay periods. If no or limited FEMA reimbursement is received, the County will have to pay for the cost of the differential with existing resources from the CARES Act and/or the General Fund.

With no end in sight for the health pandemic, the pay differential may result in a significant ongoing fiscal impact during a continued period of fiscal uncertainty. In July, the Executive recommended and the Council approved an FY21 Savings Plan totaling \$72M to deal with the evolving fiscal impact of the COVID-19 public health crisis on the county's economy, coincidentally the same estimated costs of the differential pay in 2020.

Additionally, data and information provided by the Executive Branch indicates that continued fiscal caution is warranted. Data presented as part of the Executive's FY22 Virtual Capital Budget forum² notes projected revenue reductions of \$190M in FY21 and over \$1 billion in the next six years. Further, in a letter to the Council regarding Bill 29-20, the Executive cautioned against potential revenue reductions "at a time when we're struggling to fund county services, where the outlook for the next couple of years is uncertain at best, and where full recovery from this pandemic may take as much as ten years...."

Staff suggests that the Council ask the Executive Branch how it plans to fund differential pay costs in calendar year 2020 if they are not eligible for FEMA reimbursement and beyond December 31 should the state of emergency remain in effect but no additional federal funding (beyond the current CARES Act funding) becomes available.

Council Staff Questions and Executive Branch Responses in Advance of October 13 Update of Federal Coronavirus Relief Fund

- 1. What is the status of CRF supplemental/special appropriations? Answered by the attached.
- 2. How much of each appropriation has been spent thus far and what is expected to be spent by the end of the 2020? Attached, but it's hard to project how much will be spent by the end of the year. There are a couple of the appropriations (namely the one where we're putting up frontline workers in hotels) that can be repurposed, but they've over committed so much, that doesn't make a difference.
- 3. To ensure all funds are spent, we need to appropriate the remaining funds and determine whether any funds need to be reallocated ASAP. To that end:
 - a. Is the full CRF funding expected to be spent by the Dec. 31 federal deadline? Given that we don't know how much of the differential will be reimbursed, there is a high probability that the CRF will need to absorb the difference, to the extent those costs are eligible.
 - b. Is an additional appropriation of CRF funding needed to enable the spending of all the funds by the federal deadline? At this time, it's hard to say. We need to see what portion of the differential and what other costs we've assumed are FEMA eligible are actually covered by FEMA.
 - c. Are there any allocations that need to be adjusted by the Council (i.e. are there appropriations unlikely to be spent that should be reallocated to another purpose)? We have over-allocated such that cost savings will only reduce the amount that isn't being taken from General Fund Reserves than present additional opportunities for investment.
 - 4. Are any changes in program implementation needed to ensure the expenditure of appropriations not recommended to be reallocated? None identified at this time, but this will be an area of increased emphasis over the coming weeks.
 - 5. What is the status of FEMA reimbursement submissions, and what is the timeline to receiving notification/decisions on FEMA reimbursement requests? \$24,000,000 in PPE and other non-personnel costs are being reviewed by our Public Assistance contract support, Witt O'Brien, and will be submitted shortly. An additional \$13,000,000 in PPE and other non-personnel costs is in queue for contractor review immediately upon completion of the current round. Given the size of these submissions, we are expecting FEMA review to take at least 6 weeks from the date of submission.
 - 6. What is the status of FEMA reimbursement for the COVID-19 pay differential? These remain pending. There were changes in the FEMA reimbursement guidelines on September 15 and other reimbursement rulings that created significant questions about some personnel cost eligibility. We met with FEMA representatives on Monday, October 5 to clarify some of these questions and are proceeding with data collection for reimbursement. We have added a large number of staff to this effort to address the increasing data collection burden.

MEMORANDUM

October 7, 2020

TO: County Council

FROM: Carlos Camacho, Legislative Analyst

SUBJECT: COVID-19 Pay Differential Policy Research

Executive Summary

Local governments in at least 20 states or territories have implemented <u>pay differentials or other</u> <u>benefit enhancements</u> for front line workers during the COVID-19 pandemic in an effort to compensate employees that risk exposure to COVID-19 to provide communities with essential services. Montgomery County instituted a pay differential policy on April 5, 2020 (applied retroactively to eligible employees on March 26, 2020), which is still in effect..

Following-up on requests for additional information from Councilmembers, this research details pay differential policies implemented in other Maryland jurisdictions as well as selected neighboring jurisdictions during the COVID-19 health emergency. The report also briefly details policies implemented outside of Maryland, DC, and Virginia, however in less detail than for the regional jurisdictions.

Notable findings include:

- 11 local jurisdictions, including the State of Maryland and Washington DC, implemented some form of a pay differential policy during the pandemic. Of these jurisdictions, the pay differential policies remain in effect in five and have expired in six.
- In all jurisdictions, eligibility for the pay differential focused on "essential" or "front-facing" employees that could not work remotely.
- The structure of pay differentials vary among jurisdictions, with some providing a per hour differential and others providing a fixed dollar amount.

Regional Jurisdictions with a Pay Differential

Ongoing

- Anne Arundel County
- Baltimore City
- Frederick County
- Montgomery County
- Prince George's County

Expired

- Baltimore County
- Cecil County
- Charles County
- Howard County
- State of Maryland
- Washington, D.C.
- Applying the pay differential to a common 80 hour pay period, the jurisdiction with the highest maximum pay differential that an employee could receive is Montgomery County with \$800. The lowest maximum was Baltimore City and Baltimore County with \$100 per 80 hour pay period.
- Some jurisdictions tied their policy to the duration of the County/State declared State of Emergency, while others limited their policy to a specific number of pay periods, a set termination date, or fiscal capacity.

COVID-19 Pay Differential Policies in Regional Jurisdictions

The table starting on page four details pay differential policies for 23 different jurisdictions within the region. The information on county differential pay policies - also known as hazard pay, premium pay, or response pay - stems from a survey done by the Maryland Association of Counties (MACo). In addition to the counties and cities included in the survey, staff was able to obtain similar information from the State of Maryland, Washington, DC, and Fairfax County.

Eligibility. Jurisdictions have applied COVID-19 pay differential eligibility policies to cover similar groups of employees. For example, Baltimore City, Baltimore County, Cecil County, and Charles County all specify that "essential employees," "essential public facing," or "mission critical" employees are to receive the specified pay differential. The term "public facing" to denote employees that come in close contact with the public is also used to determine eligibility in Anne Arundel, Frederick, Montgomery, and Prince George's Counties. Other eligibility criteria specified involves employees having to be present on-site in order to perform their job functions. This criterion was specifically mentioned in Washington, DC, Howard County, Montgomery County, and Cecil County but was certainly part of the eligibility criteria for other jurisdictions, as many essential and public facing employees must be physically present at their worksite in order to perform their job functions. Both Howard and Charles Counties did not provide a pay differential to department heads, deputies, appointing authorities, and other senior or executive management staff.

Amount. The amount of pay differential given to employees varied among jurisdictions, however commonalities among the policies do exist. Staff sought to normalize the maximum pay differential an employee could receive per an 80 hour work week to better show a comparison among jurisdictions.² The maximum pay differential per 80 hour work week varied from a low of \$100 given to mission critical employees in Baltimore County and Baltimore City to a high of \$800 given to front facing employees in Montgomery County. Washington, DC and Howard County took different approaches in calculating employee pay differentials. Washington, DC fixed the pay differential at \$14 per day (\$140 per 10-day pay period), while Howard County paid eligible employees a one-time bonus of either \$1,500 or \$600 depending on their need to be on-site for work.

Duration. The duration of the outlined pay differential policies was similar in policy but different in practice. Four jurisdictions - Anne Arundel, Baltimore, Montgomery, and Prince George's Counties - tied the pay differential to the duration of the County/State declared State of Emergency. Baltimore and Prince George's Counties limited their policy in other ways, such as to a fixed number of pay periods (five in Baltimore County) or to a specific date (June 28, 2020 in the case of Prince George's County). In Montgomery County, while the agreement struck between the County Executive and County employee's labor unions limited the policy to the duration of the Maryland State of Emergency it did not expressly limit the policy in any other way but instead allows for renegotiation of the policy after six pay periods. Cecil County's pay

² This calculation assumes the employees receives the full differential for the entire 80 hours.

-

¹ Follow-up calls and emails were made to counties and cities implementing pay differential policies in order to further examine these policies. No follow up was made to those jurisdictions that indicated that they had not implemented a pay differential policy as it was unlikely that they would institute such a policy at this time.

differential policy expired in June when County offices re-opened. Charles County and the State of Maryland both gave specific end dates for their pay differential policies, June 30, 2020 and May 5, 2020, respectively. Washington, DC took a different approach and specified that their policy would be in place during the COVID-19 health emergency "as long as the city is financially able to provide."

Notably, Baltimore County, Baltimore City, Charles County, Frederick County, and the State of Maryland all extended the duration of their pay differential policies at one point in time during the health emergency.

Of the ten counties/cities that responded to follow up efforts, five have since stopped giving employees a pay differential, while four – Anne Arundel County, Frederick County, Montgomery County, and Baltimore City - continue to provide differential pay. Prince George's County stated that they will provide an update once a decision regarding the extension of their hazard pay policy has been made. The State of Maryland continues to pay a \$5.13 pay premium but only to those employees working in a quarantine area.

COVID-19 Pay Differential Examples from Across the Country

Several examples of pay differential policies from across the county are summarized below. As with the regional jurisdictions, there exists an array of approaches in terms of eligibility, amount, and duration.

- The City of Atlanta, Georgia provided public safety, sanitation, and other frontline staff an additional \$500 per month through the end of September.
- In Massachusetts, employees that hold a license related to their occupation (e.g. licensed practical nurse) that are working in state hospitals, medical facilities, and group homes are eligible to receive a temporary pay raise of \$10 per hour and other state health workers are eligible to receive an additional \$5 per hour through at least May 30 and potentially through the end of the pandemic. Massachusetts has also agreed to pay a one-time \$500 bonus to eligible workers who have not missed a shift or a regular work day since the State of Emergency was declared on March 10.3
- In Michigan, the state created the <u>First Responder Hazard Pay Premium Program</u> (<u>FRHPP</u>), which is funded through the CARES Act, whereby eligible employees could earn a maximum of \$1,000 in payments. These funds are available to "first responders who have performed hazardous duty or work involving physical hardship related to COVID-19." Applications for reimbursement were accepted until September 30, 2020.
- The <u>City of Charlotte</u>, North Carolina paid employees "who have frequent, direct contact with the public, including first responders...5% over their base pay" until the stay-athome order in Mecklenburg County was lifted. The stay-at-home order <u>was lifted</u> on May 22, 2020 as the state entered into their Phase 2 reopening.
- In April, Detroit Mayor Mike Duggan passed an <u>Executive Order</u> giving the city's first responders, and other public facing employees, "Hazard Bonus Pay" in the amount of \$5 per hour. First responders working 24 hour shifts would receive a flat \$90 per shift worked.
